

**“From Classroom to Industry: An Industrial Visit to Natural Sugar Unit 2, Gunj”**

An industrial visit was organized by the Department of Commerce and Management of Shri Vitthal Rukmini College, Sawana, to Natural Sugar Unit 2 located at Gunj. The purpose of this visit was to provide students with practical exposure and to enhance their understanding of industrial operations beyond classroom learning. Such visits are essential in bridging the gap between theoretical knowledge and its practical application in real-life situations.

During the visit, the students were warmly welcomed by the factory officials, who provided a detailed explanation of the sugar manufacturing process. The visit offered a comprehensive understanding of various stages involved in sugar production, beginning with the procurement of sugarcane from farmers and continuing through crushing, juice extraction, purification, evaporation, crystallization, and finally packaging and storage. Students were able to observe the functioning of different departments and the use of modern machinery in the production process.

The visit also highlighted the importance of quality control, safety measures, and efficient management practices within the industry. Students learned about the effective utilization of by-products such as molasses and bagasse, which emphasized the role of waste management and sustainability in industrial operations. The interaction with industry professionals further enriched the learning experience, as students gained insights into real-world challenges, workforce management, and career opportunities in the industrial sector.

As a result of this visit, students developed a deeper understanding of industrial processes and enhanced their practical knowledge related to the sugar industry. The experience helped them to connect theoretical concepts of commerce and management with actual industrial practices. It also improved their awareness of workplace discipline, safety standards, and operational efficiency. Furthermore, the visit inspired students to explore career opportunities in the industrial and management fields and strengthened their confidence in applying academic knowledge in real-life situations.

In conclusion, the industrial visit to Natural Sugar Unit 2, Gunj proved to be highly informative and beneficial. It contributed significantly to the overall academic and professional development of the students and served as a valuable learning experience that will aid them in their future endeavors.

The successful organization of the industrial visit was made possible under the valuable guidance and support of the In-charge Principal, Dr. Hemant Mahalle, whose encouragement played a significant role in the smooth execution of the activity. The contribution of the IQAC Coordinator, Prof. P. P. Jaiswal, was also instrumental in ensuring the quality and effectiveness of the visit. The program was efficiently coordinated by Prof. Dr. Komal Gupta as Coordinator and Prof. Dr. Pavan Sharma as Co-Coordinator, who carried out their responsibilities with dedication and ensured the proper planning and execution of the visit. The active involvement and support of faculty members of the Department of Commerce and Management, including Dr. Ranjana Manwar, Prof. Dr. Neelu Sharma, and Prof. Kiran Shukla, further contributed to making this industrial visit a successful and enriching learning experience for the students.

### **Outcomes Of Industrial Visit**

1. Students gained practical knowledge of the sugar manufacturing process.
2. They were able to relate theoretical concepts with real industrial practices.
3. Awareness about production techniques and quality control was improved.
4. Students understood the importance of efficient resource and waste management.
5. Knowledge about management functions like planning, coordination, and supervision was enhanced.
6. Awareness of workplace discipline, safety measures, and professional ethics increased.
7. Communication skills and confidence improved through interaction with industry experts.
8. Students got clarity about career opportunities in the industrial and management sectors.
9. Analytical thinking and problem-solving ability were developed.
10. Overall industry exposure helped in improving students' professional readiness
